MALFUNCTION ANALYSIS AND TROUBLESHOOTING

Issue	Malfunction Analysis	Solution
1. Mirror is completely black/off.	No power or cable is loose.	1. Check the power connection to the mirror and the 220V outlet 2. Test the outlet with another device to verify output 3. If outlet is working fine replace power adapter
2. Display is too dim or frozen.	Software glitch or in power saving mode	1. Wave your hands and turn on the mirror 2. Perform a soft reset • Double click the left side • Long press the center bottom • Until the Clarus logo appears
3. Time/Weather data is incorrect.	Loss of Wi-Fi connection.	1. Check connected Wi-Fi speed 2. Open ClarusConnect app, • Go to Settings • Click Networks and reconnect to Wi-Fi.
4. Reminders deleted or unable to add	Software glitch or connection lost between mirror and bluetooth device	1. Log out and log back into the ClarusConnect app. 2. Unpair the device and pair again 3. Run a software diagnostic by contacting customer care

USER MAINTENANCE AND CLEANING

To clean the mirror:

1. Do not spray cleaner right onto the mirror.
2. Put a small amount of window cleaner onto the provided cleaning cloth
3. Wipe the mirror gently.
4. Never use rough cloths or strong chemicals.

The mirror's inside parts never need to be cleaned or fixed by you. Just make sure to keep the outside glass clean and dry for the best view.

CAUTIONS

- RISK OF SHOCK: The Clarus Smart Mirror is a high-voltage electrical device. Do not attempt to open the casing or perform any internal repairs.
- WATER DAMAGE: The mirror is splash-proof but not waterproof, do not spray water or cleaner directly onto the unit, and do not touch the power cord with wet hands.
- SURFACE DAMAGE: To protect the specialized glass coating, do not use harsh chemicals and rough cloths

ADDITIONAL TIPS

Software Updates : Set the ClarusConnect app to allow automatic overnight software updates. This ensures your mirror always has the latest features and security patches.

WARRANTY AND FAQS

- **Q:Why won't the mirror connect to my Wi-Fi?**
  A: The Clarus Mirror only supports the Wi-Fi band. Ensure your router is broadcasting this frequency and that you are selecting the correct network.
- **Q: How do I turn the display off completely?**
  A: The mirror is designed to enter a low-power, dimmed standby state when no motion is detected. To fully cut power and turn off the display, you must use the wall switch (if hard-wired) or unplug the unit
- The product comes with 2 year warranty
